Proposal v1.6

R400,000

Fixed price for the full build · excl. VAT

R30,000 /month

Hosting, support & maintenance from
go-live

12 weeks

To launch, from Sprint 0 kick-off

1. What this quotation covers

A fixed-scope, fixed-price build of the digital insurance platform from our Strategy & Implementation Proposal (v1.6), refined with your questionnaire answers: one platform serving clients on the web, as an installable app and on WhatsApp, with your own custom CRM at the centre — the foundation for your own products and, in time, an offering to the advisor and broker market.

Website & installable web app

Marketing site and client portal on your domain, installable on any phone (PWA). Light brand refresh included.

Custom CRM & back office

Clients, leads, pipeline, FICA onboarding, document vault and compliance records — owned by you, no licences.

Quote engine & insurer connectivity

Car/household and life quotable at launch — real-time where insurers support it, automated email elsewhere.

WhatsApp business channel

Verified WhatsApp Business API on your existing number: enquiries, quote requests, document collection and notifications.

Lead ingestion & automations

Bought-lead feed straight into the CRM, with email automations for follow-up, quotes and onboarding.

Compliance-first journeys

FAIS/POPIA-aligned client journeys built on your existing FICA documentation, prepared for Masthead sign-off.

2. Investment — fixed price

Workstream	Fee (ex VAT)
Sprint 0 — foundation Discovery, architecture, compliance pack, insurer panel confirmation, Meta verification started	R45,000
Website & installable web app (PWA) Marketing site, client portal, quote journeys, light brand refresh	R90,000
Custom CRM & back office Client & lead management, pipeline, FICA onboarding, document vault, team roles	R100,000
Quote engine & insurer integrations Launch panel: up to 5 short-term + 5 life insurers; remainder via automated email lane	R90,000
WhatsApp business channel WhatsApp Business API, conversational quote & service flows, document collection	R50,000
Lead ingestion & email automations One lead-vendor feed, automated follow-up and onboarding sequences	R25,000
Total — fixed price All figures exclude VAT	R400,000

Only R45,000 to start — Sprint 0 is credited in full against the fixed price. Payment milestones overleaf.

3. Payment milestones

Milestone	When	Amount (ex VAT)
Acceptance — Sprint 0 Signed quotation; discovery and architecture begin	On signature	R45,000
Build milestone 1 CRM core and website foundations demonstrated	End of week 4	R125,000
Build milestone 2 Quote engine, WhatsApp flows and integrations demonstrated	End of week 8	R120,000
Go-live Platform live on your domain; training and handover complete	Week 12	R110,000
Total		R400,000

4. Assumptions & client dependencies

- 1. **Compliance sign-off.** Approval of client-facing journeys by Masthead / the licence holder is a client responsibility and a precondition for launch. Delays in obtaining sign-off move the delivery date, not the price. We recommend engaging your Masthead contact during Sprint 0 with the working prototype.
- 2. **Launch insurer panel.** Integrations cover a named panel of up to 5 short-term and 5 life insurers, confirmed together in Sprint 0. Further insurers connect through the automated email lane at launch and can be upgraded to full integrations afterwards (see options below).
- 3. **WhatsApp verification.** Meta Business Manager verification is initiated in week 1; WhatsApp go-live is contingent on Meta's approval timeline, which is outside our control.
- 4. **Third-party fees at cost.** Usage-based fees (Meta conversation fees, document-AI processing, lead-vendor charges) are passed through at cost and are not marked up.
- 5. **One lead vendor.** Version 1 integrates a single bought-lead vendor; additional vendors are priced separately.
- 6. **Access & content.** You provide domain, hosting and WordPress access, brand assets, your FICA/onboarding documentation, and feedback within 3 business days at each milestone.
- 7. **Out of scope for v1.** Native app-store apps, full rebrand, commission/accounting modules and additional product lines – available as priced options below or scoped in Phase 2.

5. Priced options – add anytime

Option	Indicative fee (ex VAT)
Additional real-time insurer integration (per insurer)	R25,000 – R40,000
Native iOS & Android app-store apps	Priced on request
Additional lead-vendor feed (per vendor)	R15,000 – R25,000
Full rebrand (strategy, identity, rollout)	Separate scope

This quotation is valid for 30 days from the issue date. A detailed statement of work, incorporating the assumptions above and the agreed insurer panel, will be issued for signature on acceptance. All figures exclude VAT.

6. Acceptance
