

South Africa's Verified LPG Delivery Network

A compliance-first digital platform connecting licensed LPG operators
with customers for safe, on-demand gas cylinder delivery.

ON-DEMAND DELIVERY

LICENSED OPERATORS ONLY

CARD-ONLY PAYMENTS

LPG Distribution in South Africa is Broken

Millions of South African households depend on LPG gas, yet the delivery experience remains fragmented, unsafe, and inconvenient.

● Inconvenient Access

Customers must drive to depots or petrol stations with heavy cylinders.
No reliable home delivery option exists in most areas.

● Safety Concerns

Unregulated informal sellers transport LPG without dangerous goods permits, creating serious risks for communities.

● Cash-Only, No Accountability

Most transactions are cash-based with no receipts, no tracking, and inconsistent pricing across different sellers.

● Licensed Operators Lack Reach

Legitimate, licensed LPG operators have no digital channel to reach customers. They lose business to unregulated competitors.

Gaslite: The **Uber for Gas** - Built on Compliance

A Progressive Web App connecting customers with licensed, verified LPG operators for safe, trackable, card-only gas cylinder delivery.

● Order in Seconds

Browse 9kg, 19kg, and 48kg cylinders. Select, pay by card, and track your delivery in real time.

● Verified Operators

Every operator verified for dangerous goods licences and vehicle compliance before approval.

● Live GPS Tracking

Uber-style real-time tracking. Customers see operator location on a live map.

● Card-Only Payments

Visa, Mastercard, Amex, Apple Pay, Google Pay via Yoco. Every transaction is traceable.

● Instant Notifications

Push notifications, in-app chat, and email confirmations at every delivery stage.

● POPIA Compliant

Built with South African data protection law at the core. Full consent management.

Simple for Customers, Powerful for Operators

Customers

Browse products, place orders, track deliveries live, chat with operators, receive push notifications and email receipts.

Licensed Operators

Go online to receive orders, one-tap navigation, earnings dashboard, weekly settlements, in-app support chat with admin.

Admin Panel

Approve operators, manage orders, view analytics, process weekly settlements, monitor compliance, run campaigns.

A R30+ Billion Addressable Market

South Africa's LPG market is large, growing, and ready for digital disruption. Load shedding and rising electricity costs accelerate adoption.

R30B+

SA LPG Market (Annual)

Households Using LPG

<1%

Currently Served Digitally

Key Growth Drivers

Load Shedding

Chronic electricity instability pushes households to adopt LPG as a reliable alternative energy source.

Rising Electricity Costs

Eskom tariff increases of 12-18% annually make LPG increasingly cost-competitive for cooking and heating.

Smartphone Penetration

Over 90% of SA adults have smartphones, enabling app-based ordering and digital payments at scale.

Multiple Revenue Streams

Revenue Breakdown

Service Fee	R29 per order (flat fee)
Processing Fee	2.6% + 15% VAT on card payment
Subscription	R39/month per active operator
Margin	Revenue retained after operator commission

Operator Commission per Delivery

CYLINDER	CUSTOMER PRICE	OPERATOR EARNS
9kg	R262	R80
19kg	R552	R200
48kg	R1,345	R500

Unit Economics (19kg Order)

Customer Pays	R552
Operator Commission	-R200
Gas Supply Cost	-R280
Service Fee Retained	+R29
Card Processing (Yoco)	-R16.50
Gross Margin per Order	R84.50

Scale Projection

At 100 orders/day average:

Daily Revenue	~R8,450
Monthly Revenue	~R253,500
Annual Revenue	~R3.04M

Our Unfair Advantages

● Compliance-First Positioning

Only licensed operators with dangerous goods permits. A trust moat that competitors cannot replicate.

● Full-Stack PWA

No app store dependency. Works on any device with push notifications, offline support, and installability.

● Card-Only Payments

Every transaction is digital and traceable. Enables trust, automated settlements, and future lending.

● Data Advantage

Real-time demand data enables dynamic pricing, demand forecasting, and supply chain optimisation.

● Regulatory Barrier to Entry

LPG transport is heavily regulated. Compliance is built into our operator onboarding by design.

● Network Effects

More operators = faster delivery = more customers = more orders. A self-reinforcing flywheel.

● Proximity-Based Matching

Haversine algorithm matches the nearest available operator within 10km. Efficient, fast logistics.

● First-Mover in Verified LPG

No other SA platform combines compliance verification, live tracking, and digital payments for LPG.

What We've Built So Far

Full MVP
Live & Deployed

3 User Roles
Customer / Operator / Admin

Yoco Payments
Integrated

Live GPS
Tracking Active

Product Features Completed

Customer App

Product browsing, card checkout, real-time delivery tracking, push notifications, in-app chat, order history, email receipts

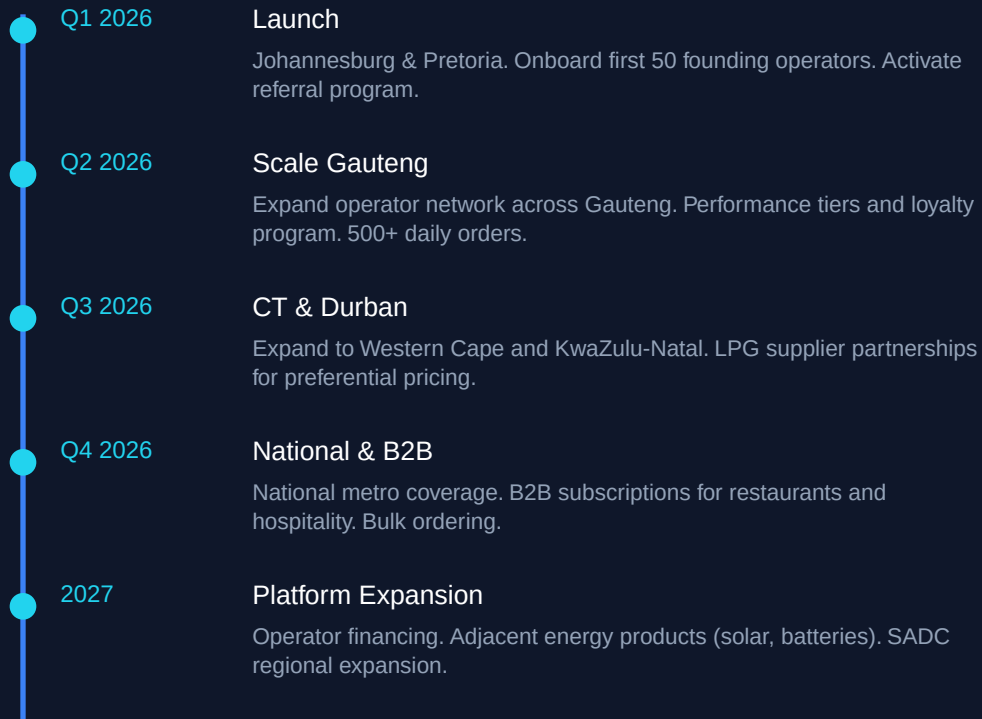

Operator Dashboard

Go online/offline, accept orders, GPS navigation, earnings dashboard, weekly settlement history, admin support chat

Admin Panel

Operator approval workflow, order management, settlement processing, analytics, referral program, launch campaign tools

The Path to Market Leadership

Year 1 Targets

Licensed Operators	200+
Registered Customers	25,000+
Daily Orders	500+
Cities Active	5+
Annual GMV	R100M+

Future Revenue Streams

- Operator Financing - Working capital loans from transaction data
- B2B Subscriptions - Recurring delivery for restaurants & hospitality
- Advertising - Promoted listings for LPG suppliers and brands
- Certification - Operator training and licensing services

THE ASK

Join Us in Building South Africa's LPG Future
